

## Purple Obsession

Stephanie Rapp Interiors

Stephanie Rapp Interiors was inspired by an explosion of the color purple in a piece of Abstract art by Julia Contacessi called Bliss.

Its energy, expressing all shades of that regal tone, led her to create a seating area for lively conversation anchored by 2 low slung Bernhardt Lance chairs with striking brass frames.

The aged brass and shagreen console table from Interlude provides a landing spot for accessories accented with purples, pinks and gold, all referencing back to the alluring art hung on the wall above.

In the corner resides a white marble drinks table from Interlude alongside an eyecatching chair of Pony hair and leather. It's a quiet moment within the vignette enveloped in a purple Zimmer + Rhode silk while boxed abstract squares by Teodora Guererra cascade down the wall. Furniture and accessories provided by Wakefield Design Center, to the Trade. Featured art provided by Sorelle Gallery.
